STRIKER-II®

DATA SHEET

HIGH PRESSURE 2-STAGE FIRE PUMP

The **WATERAX STRIKER-2** also known as STRIKER-II Plus® pump, pairs a reliable 2-stage pump end with the **Honda 4-stroke 13 HP** engine to achieve pressures of up to **230 PSI (15.9 BAR)** and flow rates reaching **105 GPM (397 L/Min)**. It can be used by itself, in tandem or in parallel with other **WATERAX** pumps, and is also a very popular choice for slip-on applications.

The **WATERAX** quick release clamp provided on the **STRIKER-2** pump lets you replace a damaged pump end in the field with minimal equipment downtime. This interchangeability greatly reduces your spare parts inventory and improves your ability to respond to unforeseen equipment damage. The **Honda 4-stroke 13 HP** engine makes for ease of operation and engine parts sourcing.

Emissions compliant; engine is CARB and EPA certified

Applications

- Firefighting operations using higher flows
- Accuracy in flow trajectory when structure fire fighting
- Tandem pumping over long distances
- Parallel pumping for higher volumes
- Slip-on units

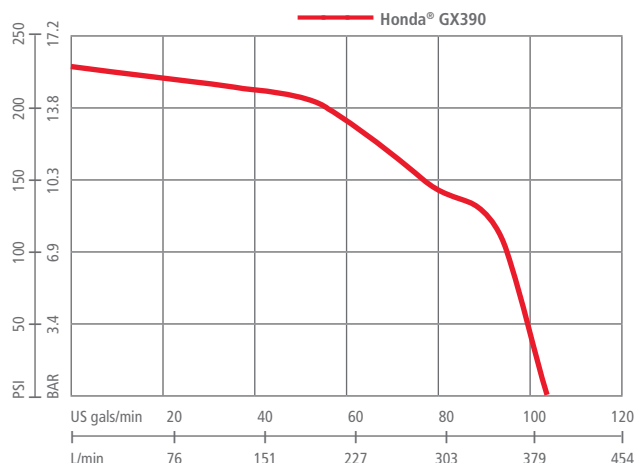

Features and Benefits

- Quick release clamp and swappable pump ends for minimal equipment downtime and inventory
- Sealed bearing to eliminate pump end greasing in the field
- Belt drive system for reliable, low maintenance performance
- Aluminium alloy pump components and anodized parts for lighter weight and greater resistance to corrosion
- Comprehensive user and service manuals
